

PRESS RELEASE

ARMY TECHNOLOGY SEMINAR

Indian Army is continuously striving to identify indigenously developed niche technology and equipment which can give it a definite edge in operations. Indigenously developed technology and equipment will assist in increasing self-reliance in defence and contribute significantly to the '**Make in India**' initiative.

In order to achieve the above, second edition of Army Technology Seminar is being held at Manekshaw Centre on 08 January 2018. The theme of the seminar this year would be '**Technology as a Key Enabler to Overcome Challenges of Military Operations in High Altitude**'. The seminar would highlight the current and long term needs of technology and equipment for the Indian Army.

Indian Army took the initiative of publishing the current technology problems being faced in form of two compendium and has got encouraging response from Industry and Academia. In order to further consolidate on the advances made, a **third compendium of Problem Definition Statement from Army Design Bureau will be released during the seminar.**

A exhibition comprising of Innovations undertaken within the Army, solutions to Problems given by Academia and Industry would be organised as part the of seminar. The event is being attended by Serving Officers of Indian Army, DRDO Scientists, representatives of Industry and Academia. The Hon'ble Raksha Mantri, Raksha Rajya Mantri and Chief of Army Staff will also be gracing the occasion with their presence.
